

MY PROJECT

Gaming Store

Ardit Goxhufi

Student Name & Surname

□ Goal and Tasks

□ Project Goal

What did you want to achieve?

Create a website to showcase and sell gaming equipment.

What did you want to achieve?

Showcased products with images, prices, and navigation.

Key Tasks

List 3 main steps

1

Design

2

Products

3

Navigation

□ My Tools

□ What programs, languages, or environments did you use?

Add More

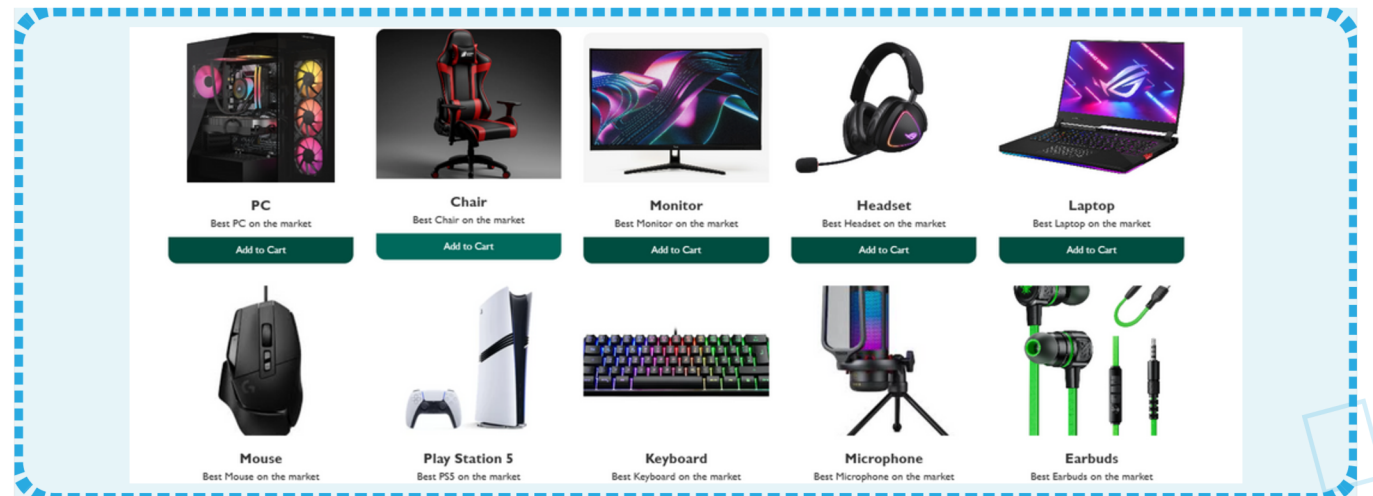

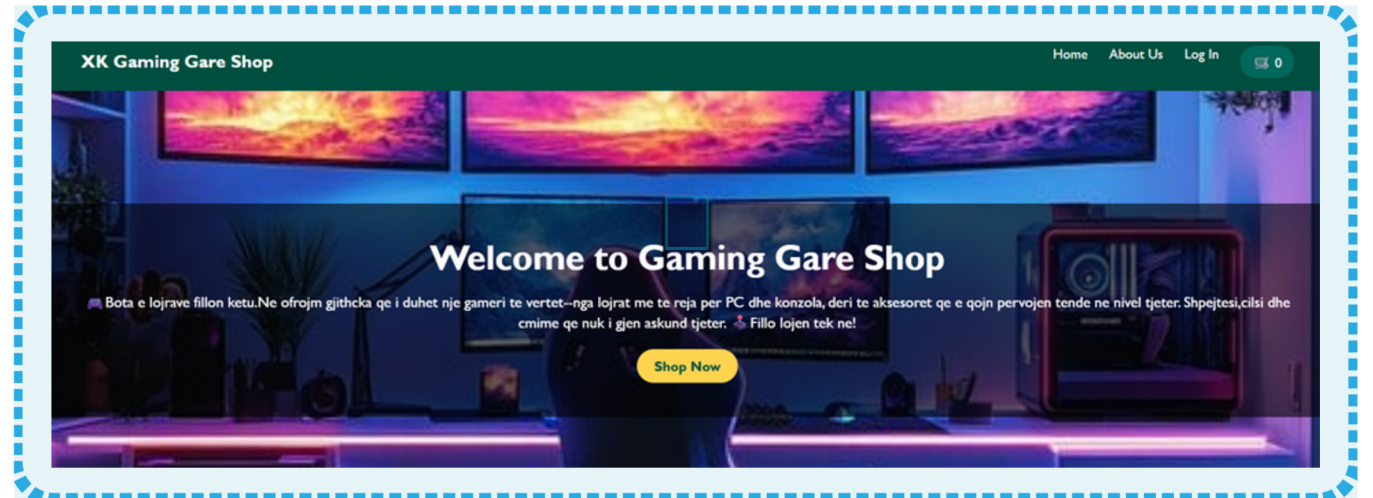

How did this help me?

It helped me practice web design, improve my coding skills, and understand how to create an online store.

□ About the Project

□ Tell us what your project does?

- *What is your program/game used for?*
To browse and buy gaming equipment online.
- *Who will use it?*
Gamers and gaming enthusiasts.
- *What is its main feature?*
Product showcase with prices and navigation.

□ Conclusion

□ Summarize the main results of your project

- *I successfully created a gaming store website with products*
- *My project helps to sell gaming equipment online.*
- *I learned how to use HTML, CSS, and JavaScript.*
- *In the end, I have created a functional gaming store website.*

□ What is Next?

Next, I want to add more gaming products to expand the store, improve the website design to make it more attractive and user-friendly, implement interactive features using JavaScript, and learn about online payment systems so users can buy products directly from the website.

What is Next?! Key Goals:

- Share project with friends
- Add new features
- Learn a new language
- Publish online

My Insights

☐ Transformation

I used to think that building a website was hard, but now I know I can create one step by step.

 Surprise

I never thought that I could build a gaming store website. Is that even possible?

☐ Discovery

Turns out, it really works...

THANK YOU!

TO MY TEACHER

"Thanks for helping with the code..."

TO PARENTS

"Thanks for believing in me..."

TO MYSELF

"I did great because I didn't give up..."
